

Tera Capital Fund

Results through March 2007

Fund Information

Strategy: Invest assets in major funds while maintaining a diversified portfolio by country, sector, size and strategy. Tera invests in the CIS and Eastern Europe, with most investment currently in the Russian Federation.

Investors: Tera Capital Fund is focused primarily on investors interested in investing at least \$10,000, with no maximum investment. Through Tera, smaller investors can receive a return on investment that is normally only possible for very large investors in major funds where the minimum investment can be \$1 million or more. In this way, investors in Tera Capital Fund achieve high rates of return from their investments at moderate risk because of TCF's diversified approach.
